Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

1. Claims 1-4, 6-7 are allowed.
2. Relative to independent claim 1 the major difference between the teaching of the prior art of record (Ito, Imai et al. and Hartung et al.) and the instant invention is that the said prior art **does not teach** that for a display device which includes a driver circuit, an image data memory and a display with a plurality of rows and columns, coupled to the driver circuit, where a number P_{max} indicates a maximum number of rows that can be simultaneously driven in the display device and where the display has a multiplexibility of m , wherein the display device derives the number P from the display size to be driven, and configured to adaptively select the number of P in response to a change in a display mode that controls the display size to be driven, wherein the driver circuit includes a plurality of voltage driver stages for generating corresponding partial voltage values for driving the display, and is configured to selectively switch off driver voltage stages in response to a change in the selected number P , and the an image data memory coupled to the display, that there is a maximum number of rows, P_{max} that can be simultaneously driven, and that the display is operable such that a number of image data bits accessed from the image data memory, is equal to P_{max} regardless of the value of P .
3. Claims 2-4, 6-7 dependent on claim 1.
